

Joe Winton

My family moved to New Zealand in 2016 and Ngaio school and the community have been a big part of our lives ever since. I have three children, my middle child is at Ngaio School - in year 3, my eldest is now at Rāroa Intermediate after six wonderful years at Ngaio and my youngest is due to start in 2024.

Our family spends a lot of time together outside, so most weekends you will find us at the beach or bush. We have a beautiful, green community with lots of great spaces to explore and I want to make sure that all our kids have an amazing outdoor space in which to learn and grow at Ngaio School.

I manage the production of data and statistics for a government ministry. My job is taking complex things and making them easier to understand. I hope to do this for the community with student achievement data so that everyone can feel confident that Ngaio School is doing everything it can to help us to nurture our amazing kids, and that the teachers and management have the support they need to make sure that happens.
